37. Philodendron
38. Lianas
39. Wild Avocado

With his skilled hand and keen eye, Cincinnati, Ohio, wildlife artist **Charley Harper** has transported into this poster the excitement, color, and vibrant life of the **Monteverde Cloud Forest** which local children shared with Charley and his wife Edie when they visited. Now you, the viewer, have a looking glass into the magic of the world's most ecologically diverse and fragile forest. Using minimal realism, Charley has depicted 39 of the plants and animals he encountered. If you have been to Monteverde, you can appreciate the uniqueness of the environment through the poster; if you have never been there, we hope it invites you to visit.
